"Inspected and Approved!"

THINK what this means to you. Every accessory listed in this catalog has been thoroughly inspected and tested by our engineering department and has only been approved after it has met their most exacting standards. The same engineers who design and test Harley-Davidson motorcycles and sidecars, pass on the design, construction and serviceability of all the accessories offered by our Accessory Department.

All Inspected and Approved Harley-Davidson Accessories are inspected before they are accepted by us. Every glove, every lamp, or whatever the item may be, is carefully inspected for manufacturing defects and anything not perfect is refused.

To identify the accessories we sell as coming from the Harley-Davidson factory, many bear our name and trademark on the item itself. Others are identified by the orange and black label. You can purchase any item bearing this label with entire confidence, knowing that it has passed our rigid inspection and has our unqualified approval.

Harley-Davidson Motor Co.

Milwaukee, Wis., U. S. A.

Be Sure You Always Get the Genuine Harley-Davidson Oil

Here is the new five gallon can of Genuine Harley-Davidson Oil. It is much more convenient than the old can, and being weighted in the bottom handle it always remains upright and will not tip. Special drain spout is provided at top opening. You can save a nice little sum by buying this genuine oil in the larger container.

This one gallon can will fit nicely under the sidecar seat. Play safe and when you take a trip carry a can with you.

Supplied for dealers in these 30 and 55 gallon drums.

Harley-Davidson Batteries Will Give You Better Service

4303-26

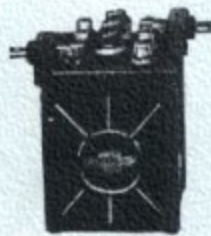

Look for the Harley-Davidson trademark when you buy a new battery. It is your assurance of superior battery value—the very best on the market. It is the one motorcycle battery that is backed by Harley-Davidson service.

It is to our interest that Harley-Davidson owners obtain maximum service and satisfaction from their motorcycles. For this reason our electrical engineers have given a great deal of study to batteries, in order to provide a battery that will stand up to the rigid requirements of motorcycle service. The Harley-Davidson Battery is designed and constructed to give better service to Harley Davidson owners—one that will stand up under hard service—a battery on which we do not hesitate to put our stamp of approval.

4303-29

On Harley-Davidson Batteries the terminals extend outside the battery box and are accessible. Large vent plugs make it easy to add distilled water. Both case and jar covers are extra heavy and strongly reinforced. The connector parts that carry the plates are extra heavy and are firmly fastened into the top.

4303-15

Made in three sizes as follows:

	Code

4303-29—Fits 1929 Singles and 45" Twins.....	* 12.00 avghi

Dry Batteries Supplied upon Request

Easy Riding Mesinger Tandems

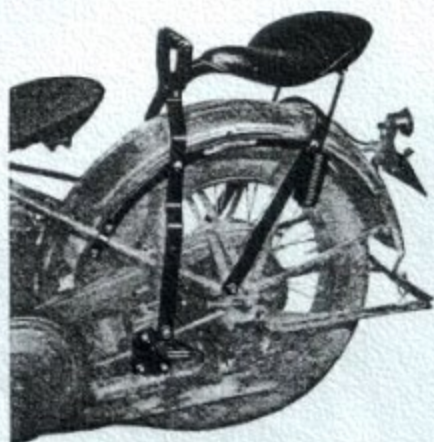

WITH a tandem seat on your bus you can give your pal or girl friend a lot of pleasure and have more fun yourself.

The famous Mesinger Tandems, shown at right, are well known for their easy riding comfort and can be readily attached in a few minutes.

The most popular tandem on the market is the Standard Mesinger Tandem. It has a very comfortable bucket type seat of finely grained leather mounted on two tension springs. A handle grip and convenient foot rests are also provided.

The Mesinger Social Seat is by far the most comfortable tandem obtainable. The form-fitting saddle is fitted to a pair of long enclosed cushion springs, to eliminate all road shocks. The handles are adjustable and the foot rests are amply large.

Designed to fit the Harley-Davidson Luggage Carrier. Coil springs provide maximum riding comfort. Covered with waterproof fabric. The base is hardwood and fastened securely to the carrier. Code

11285-X*\$4.00 begen

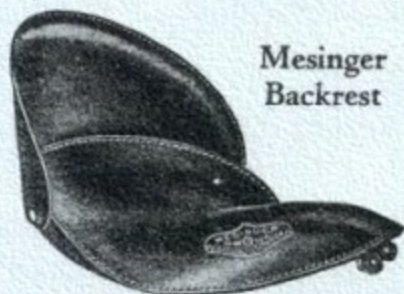

Saddle Cover

Motorcycle riders appreciate the added comfort afforded by this extra soft, evenly clipped sheepskin saddle cover. This unusually fine cover is not shaggy and will not mat down. The long, fur-like wool is 3/4-inch deep and a special process of treating the wool makes it stand up after long, hard use.

This genuine Harley-Davidson saddle cover is made of ONE PIECE of thoroughly cured sheepskin and has no seams or ridges. Easy to attach, or remove in a jiffy. Code

Foot Rests

These Stoll Footrests fit all models. In combination with the Harley-Davidson Carrier and the Spring Cushion they make a dandy tandem attachment. Made of heavy metal with strong attaching clips. Can be folded when not in use. Code

11286-X*\$2.50 begfo

Equip Your Motorcycle with a Corbin Speedometer

The Corbin Speedometer operates on the centrifugal principle. It is dependable and accurate. In addition to the regular speedometer features it can be obtained with a maximum hand that automatically registers the highest speed attained and remains there until released to zero by pushing the plunger located on the side of the head. Of course there is a speed hand that registers your varying speeds as you ride along. Also has

season and trip odometers with trip release plunger.

Slip-On Gloves

Here is just what you need for summer riding—an unlined leather glove with a loose cuff. Easy to put on or off in a jiffy. Made of soft, black horsehide with full welted seams. This glove was especially designed for motorcyclists and made to our specifications. Seamless palm. Very tough and durable, yet not too warm for summer use. Made in half sizes from 7 to 10. Look for the Harley-Davidson trademark in each glove.

Code
11080-X—Per pair*\$2.50 baalp

Leather Helmets

Made of soft, genuine horsehide leather in a smart, racy style. Close fitting and weather-proof. Choice of light chamois lining for warm weather or sheepskin lining for cold weather. Made in two colors—black and brown—and in small, medium and large sizes. Our trademark appears inside each helmet.

Code

Black Horsehide Leather Coats

Wear one of these warm leather coats and you'll get a new joy out of motorcycling in the fall, winter and early spring. Cold winds will have no effect on you. Well made of the best quality, soft, pliable black horsehide leather, in a smart, double breasted, full fitting style with leather lapped convertible collar. Body is lined with wool mackinaw cloth and the sleeves are moleskin cloth lined. Coat is full 36 inches long and is finished with two slash top pockets and two lower side flap pockets as shown. Sleeves have wristlets and adjustable cuffs. All around leather belt. Sizes 36 to 48.

Code
11071-X\$22.00 bahtz

Police Coat

The special police uniform coat is exactly like the coat described and illustrated above except that it is fitted with shoulder and badge straps and special police buttons.

Code
11072-X—Police special\$23.00 baiba

Black Horsehide Leather Riding Breeches

Here is a popular accessory that will add to your winter riding comfort. Leather breeches give splendid protection against wind and cold.

Made of soft, pliable black horsehide leather which will not peel or harden after exposure to wet weather. These breeches are cut full and roomy at the hips and snug fitting at the knees. They are lined with khaki cloth and finished with 5 pockets and belt loops. The seat is strongly re-inforced to withstand hard wear. Sizes 28 to 42. Harley-Davidson trademark on the hanger strap.

Code
11068-X\$17.00 bahio

Brown Cowhide Leather Belts

A favorite with many motorcyclists. Made of heavy selected brown cowhide, seven inches wide with three buckles. Can be obtained in two grades, A & B. Sizes 28 to 36.

Code
11073-X—Grade B*\$4.00 bahau
11074-X—Grade A* 5.00 bahye

Pocket Belt

The same excellent material as above, but a more classy appearance. Has two leather pockets with flaps as shown.

Code
11075-X*\$6.00 baiah

You'll Look Good in These Nifty Puttees

Shaped to fit the leg snugly, these puttees can be put on or taken off in a jiffy. Choice of two styles—loop front or spring front.

At left, below, is shown the Loop Front Puttee. Made of selected full grain black cowhide. Well formed—built to keep its shape. The popular new loop front feature adds considerably to its appearance and has proved entirely practical. Comes in half sizes from 14 to 17.

The ever-popular Spring Front Puttee, shown at the right, is also made of selected full grain black cowhide. It has a double prong front spring which allows an adjustment of $\frac{1}{2}$ size either way. Comes in full sizes only, 14 to 17.

The Spring Front Puttee is also made in a good, serviceable grade of black split leather with a single prong spring. Half sizes, 14 to 17.

	Code
11090-X—Loop front, pair.....	\$6.50 bajdl
11091-X—Spring front, cowhide....	6.50 bajem
11089-X—Spring front, split leather..	4.50 bajai

Button Collar Jerseys

When you ride out with the bunch on club runs and tours, you will certainly want to wear one of these smart jerseys. They are warm and mighty good looking. Identified as genuine by the trademarked hanger strap inside the collar.

This popular button collar style jersey shown above is made of fine quality all wool yarn in a live green heather color.

Choice of either two-inch Harley-Davidson white felt letters or the Harley-Davidson felt monogram on the front. All sizes from 36 to 44.

	Code

"Little King"

"KAY BEE"**Spotlights**

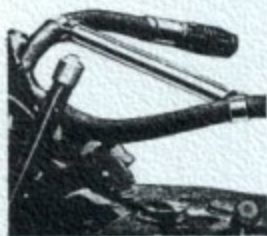

Turn on your Kay Bee Spotlight and watch a big, bright ray of light stream out over the road ahead. Makes clear as day any particular section of the road you want

to illuminate. Strange roads are easy to drive over when your Kay Bee is on the job. This spotlight is quickly attached or detached. It is light in weight and therefore places a minimum of strain on the attaching bracket. The reflector is heavily silvered and there is a substantial and efficient switch in the handle. A neat handlebar switch is available for those who prefer finger tip control of their spotlights.

**Handlebar Crossbar**

Fit one of these classy Handlebar Crossbars to your Harley - Davidson. Then you can mount that new spotlight, handlebar watch, or other accessories on it. It certainly will add class to your motorcycle. Made of steel tubing with solid steel end inserts. The crossbar and clamps are nickel plated and highly polished. Easy to attach.

Code
11359-X*\$2.40 bemy

**Front License Bracket**

Some states require motorcycles to carry both front and rear license plates. If such a law exists in your state, you will want one of these handy brackets for your Big Twin. Bracket is neatly formed to fit over the tool box. Holes are punched to match up with the holes in the tool box bracket. The same bolts and nuts are used.

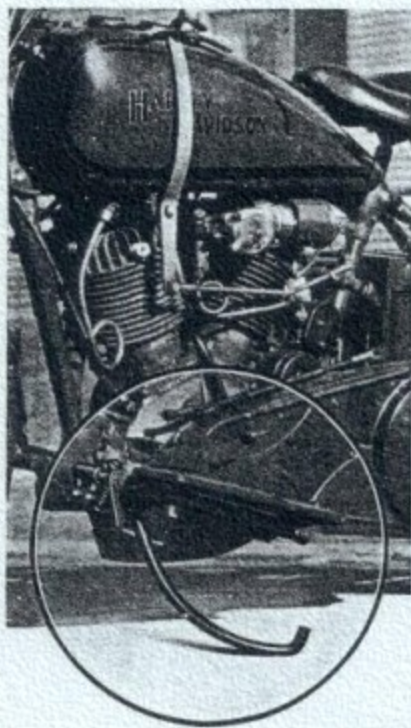

Code

Harley-Davidson Windshields

Sidecar Windshield

YOUR sidecar passenger will surely appreciate the comfort and convenience of this Harley-Davidson sidecar windshield. It furnishes complete, all-weather protection from wind and rain.

A transparent Puralin shield affords a clear, uninterrupted view of the scenery. The Puralin, which is 9 $\frac{1}{4}$ inches high, is 50% heavier than is ordinarily used. This additional strength adds greatly to the life of this durable and very practical windshield.

Adjustable brackets permit placing the windshield in the most comfortable position for the passenger, without interference with the driver. The whole windshield tilts forward to permit easy entrance to and exit from the sidecar. See illustration at the bottom of next page.

This windshield can be attached to your new or old sidecar in a very few minutes and it will add immeasurably to your passenger's enjoyment of motorcycling.

11000-X—For single passenger LT and LS sidecars.....	\$16.15	Code baaba

11320-26—For singles.....	* 6.00	bejco

for Motorcycles and Sidecars

Handlebar Windshield

Here is a windshield that protects the Big Twin rider from winter's chilliest blasts but allows plenty of air to pass over the motor. With this new windshield, the apron need never be turned back away from the motor to let the air in around the cylinders. All this has been taken care of by means of two metal air tunnels, one on each side of the motor. Even in the mildest weather the motor cannot overheat when the machine is in motion. It is always kept at the most efficient operating temperature.

The windshield apron is made of long-wearing, waterproof fabric which gives the rider's legs ample protection. Extra heavy Pyralin affords the rider unobstructed vision at all times. A small Pyralin window directly in front of the electrical panel allows the parking light to show from the front as well as from the rear.

For the 45 Twin and the Singles, this windshield is not fitted with the air tunnels. It is made so that the apron can be easily buttoned back away from the motor to allow greater circulation of air around the motor in mild weather.

The Harley-Davidson Handlebar Windshield is easily attached and quickly taken off and will give long, satisfactory service. It is one of the most popular attachments ever designed for motorcycles and has given additional riding comfort to thousands of Harley-Davidson owners.

Tire and Luggage Carrier

This convenient tire carrier and luggage rack provides a convenient place to carry a spare tire and tube, as well as any luggage you want to take along. The luggage rack folds up when not in use. The item improves the appearance of the outfit and is very convenient. Strong enough for the roughest use.

Ammeter

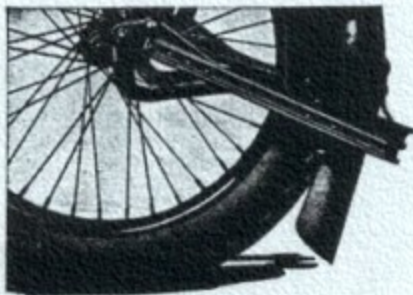

Everyone knows the value of an ammeter and how it keeps the driver informed as to whether or not the battery is charging. Only a high grade ammeter should be used. The ammeter we recommend is a Weston, made specially for use on Harley-Davidsons, and is the same as used as standard equipment on 1929 models.

Drive Chain

As it is usually better to buy chain cut to length and thus save the time and waste incidental to cutting up bulk chain, we are listing the cut length sizes as well as bulk chain. The new front double chain as used on 1929 singles and 45" twins is sold only in motorcycle lengths as it should only be used as a continuous chain, without a removable connecting link.

CUT LENGTH CHAIN—DUCKWORTH ONLY

Each length includes a connecting link.

All Rubber Patch Stock

This all rubber patch is supplied in one strip ten inches long and three inches wide. Supplying the patch in this size is a great advantage over the usual round or oval patches for it enables the motorcyclist to cut off a piece of the patch to fit the exact size of the puncture or blowout that is to be repaired. Patch stock, together with a tube of cement and a metal buffer, come packed in a round container with a metal screw top.

	Code
11571-X	*\$.25 bijyo

Rubber Cement

This is a medium heavy, quick drying pure gum cement put up by the Goodrich Rubber Company. We recommend it for all around use. Comes in tubes four inches long.

	Code
11576-X—Per Tube	*\$.10 bikia

Va-Car Casing Patches

This self-vulcanizing patch forms a permanent, self-sealing repair for punctures, breaks or blow-outs. When placed inside the casing directly under the break and applied according to instructions, this patch fills and seals the hole forever. Vulcanizes automatically while you ride. Outlasts the tire. Made in three standard sizes to fit any casing, or any size break.

	Code
11582-X—Spot patch	*\$.15 bikyp
11583-X—Small size patch.....*	.35 bilat

Harley-Davidson Chain Grease

This is an extra fine quality lubricant possessing a very high melting point and an extremely low congealing point. It is especially recommended for oiling drive chains because of its excellent lubricating properties and ease of application. This grease requires no heating or melting and regular application will add many miles to the life of your chains and sprockets.

This Chain Grease is put up in convenient tubes and cans.

	Code

Harley-Davidson Grade "A" Grease

Grade "A" Grease is especially recommended for use in any ball or roller type bearings that are subjected to high temperature and severe usage. Especially suitable for Rear, Sidecar and Front Wheel Hub Bearings, Generator Bearings, Transmission Bearings, Clutch and Pull Rod Bearings. This grease has a very high melting point and an extremely low congealing point. It is put up in 1 lb., 2 lb. and 5 lb. cans.

	Code

11675-X—5 lb. can.....* 1.50	biweh

Alemite Lubricant and Gun

One of the biggest features of the later Harley-Davidson models has been the introduction of the famous Alemite System of lubrication. This system, first instituted into the motorcycle field by Harley-Davidson, takes but five minutes to thoroughly lubricate the entire machine and sidecar. Simply hook the cap of the gun over the fitting, turn the handle, and the lubricant is shot right where it is needed under 500 lbs. of pressure. A half back turn of the handle releases the pressure and you are ready for the next fitting.
